

Technical data sheet

Title	Thimble
Standard	DIN 6899

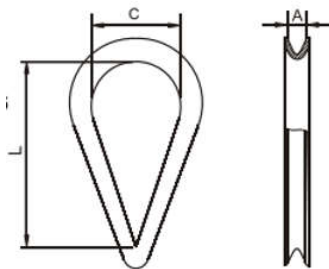

1.- Purpose and field of application.

Thimbles are used to protect cables and end pieces. This makes them an ideal complement for cable clips.

Main characteristics:

- Accessory for protecting cables and end pieces from premature wear;
- They are made from steel with electrolytic zinc plating, or of stainless steel.
- Manufactured according to the DIN 6899 Standard;

2- Product dimensions and code.
